Remember-mode Integration

See the manual for how to make remember.el use Org-mode
links and files. The note-finishing command C-c C-c will first
prompt for an org file. In the file, find a location with:

rotate subtree visibility TAB
next heading DOWN
previous heading UP

Insert the note with one of the following:

as sublevel of heading at cursor RET
right here (cursor not on heading) RET
before current heading LEFT
after current heading RIGHT
shortcut to end of buffer (cursor at buf-start) RET
Abort q

Completion

In-buffer completion completes TODO keywords at headline
start, TeX macros after “\”, option keywords after “#-”, TAGS
after “:”, and dictionary words elsewhere.

Complete word at point M-TAB
