| separator at least 3 spaces | C-3 C-c                   |

### Commands available inside tables

The following commands work when the cursor is *inside a table*. Outside of tables, the same keys may have other functionality.

### Re-aligning and field motion

| re-align the table without moving the cursor | C-c C-c |
|--|---------|
| re-align the table, move to next field       | TAB     |
| move to previous field                       | S-TAB   |
| re-align the table, move to next row         | RET     |
